It is important to note that the HRSA BPHC has also included the following as it relates to Table 4 of the UDS where the number of migratory and seasonal agricultural workers seen by the health centers is reported.

“Are there any changes to this table?”

Minor changes have been made to the definition of agriculture, however the definition includes no new individuals not previously defined as migrant or seasonal agricultural workers. “

Given that the UDS reporting is on a calendar year basis any changes are most effective when adopted at the beginning of the year. While grantees will find it a challenge to incorporate these changes for the 2012 calendar year reporting due February 15, 2013, for 2013 it will be important for staff and systems to be aware of the changes to maximize the number of agricultural workers that can be counted for UDS reporting and any related HRSA utilization.
