

2022 HIT Symposium Sponsorship Opportunities

Each year the Arizona Alliance for Community Health Centers and Nevada Primary Care Association bring together Healthy Communities Collaborative Network participants for an all-day symposium focused on health information technology (HIT). A variety of team members from Arizona and Nevada Community Health Centers participate, including HIT directors, informatics staff, data analysts, operations personnel, quality and clinical leadership, and c-suite members. Topics for this year's event include cybersecurity, social determinants of health, remote patient monitoring, and patient engagement.

This will be a hybrid event. The event venue supports a maximum of 75 in-person attendees. In-person participants will be asked to wear a mask while indoors regardless of vaccination status unless actively eating or drinking. If you are interested in one of the sponsorships below, please reach out to Da-Nell Pedersen at danellp@aacchc.org.
